SKILLS

- Elevated understanding of Python and Java developed through personal projects/courses
- Superb knowledge of HTML5 and CSS3 built through personal and professional web design
- Excellent knowledge of Active Directory administration built through IT administration
- Exceptional PowerShell scripting skills developed while automating staff profiles/procedures
- Outstanding communication skills obtained while leading a training program at McDonald's
- Outstanding time management shown through balancing multiple time sensitive IT projects

---

EDUCATION

University of Toronto Scarborough   **September 2017 – Present**
Candidate, Honours Bachelor of Science
- Computer Science, Software Engineering (Co-op) Stream, 2nd Year (cGPA: 3.46/4.0)
- Received Entrance Scholarship ($3000) and Dogwood Scholarships, British Columbia ($1250 x 2)

TECHNICAL PROJECTS   **September 2017 – Present**
- Developed a web-based script (SST & SQL) for Ontario Shores that automated the submission of daily reports to the Ministry of Health which allowed for more efficient resource allocation
- Implemented (PowerShell, SST) the automation of an access provisioning project at Ontario Shores, gaining valuable skills in scripting, project management, documentation, and design
- Implemented a fixed navigation bar for Ontario Shores "100 Years' Timeline" website using HTML5 and CSS3, which improved the usability of the page and my understanding of web design
- Built a command line/shell with three teammates using Java, SVN, OOP, TTD, scrum methods, UML's, and unit testing which resulted in a better understanding for the development life-cycle
- Designed a personal GitHub page using HTML5, CSS3, and Git after teaching myself how to use these technologies which resulted in an increased understanding of and passion for web design

---

EXPERIENCE

Programmer and IT Service Desk Analyst   **September 2018 – April 2019**
Ontario Shores Center for Mental Health Sciences, Whitby, ON
- Developed scripts in PowerShell and Summit Scripting Toolkit that automated IT access/staffing processes which optimized department resource use and improved procedure standardization
- Provided IT assistance to employees struggling/encountering problems with their devices and profiles which resulted in improved listening, patience, and problem solving abilities

Swing Manager   **April 2014 – September 2016**
McDonald's, Victoria, BC
- Gained invaluable organizational, multi-tasking, communication, leadership, and management skills while managing shifts, the training and customer recovery programs, and weekly payroll
